

# Defining Safe Water Quality Parameters

**Team Members:** \_\_\_\_\_

**Instructions:** Use the pH and dissolved oxygen materials provided to complete the chart for the values that are safest for these organisms. If the information is not on the charts, where can you find it?

Type of Organism	Dissolved Oxygen	pH
Blue Crabs		
Stripped Bass		
Worms		
Other: _____		

**Weigh-in:**

Why is it important to monitor these parameters?

How do fluctuations in these parameters most likely impact these organisms?
