

The Consequences of Marine Debris

Team Members: _____

Instructions: Consider the data collected from your transects. What did you find? What does this data mean for the health of the water and the organisms that live in it? Use articles and videos from the sessions to reflect on possible consequences of the presence of this marine debris.

Type of Marine Debris Found	Possible Consequence	Why?

Weigh-in:

What themes run through the consequences you listed? Why?

What other factors would you like to have considered that were not available in your resource materials?

What was missing from your data? Why?
